

Week 1 — How Each Game Plays Out

40,000 sims/game · Vegas-anchored means & win probability · offseason edition

How to read this. Each game is simulated 40,000 times. The two things that are **real**: the team means come from the posted Vegas implied totals, and the spread calibrates the win probability (a -7.5 favorite wins ~72% here because that is what the market implies). Everything shaped on top — the spread of outcomes (SD 9.5, ceiling-modulated), the two teams' co-movement (ρ rising with the total), and the pass/run script shifts — are **stated priors** anchored to NFL-empirical dispersion, not fit to 2026 results (none exist yet). So trust the *ordering and the shape*; treat any single percentage as "what these assumptions imply," not a measured frequency. The distribution is shown first; the most-likely script read follows it.

DAL vs NYG O/U 50.5 · DAL -1.0 · sim total 50.9 · ρ 0.10

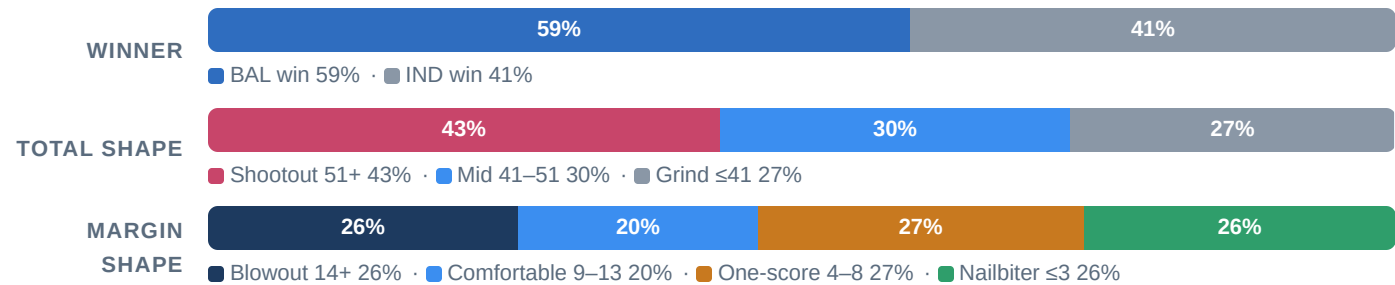

Most likely: DAL wins, a blowout (14+) the model hits 29% of the time, in what profiles as a shootout (51+) (46%). DAL is favored to win 52% of sims; the total clears the posted 50.5 in 47%.

Script read: no single script dominates — it profiles as a competitive, pass-friendly game where neither side controls and both offenses stay aggressive; the bring-back stays live.

Script-adjusted pass lean: **DAL** pass 55% ▲ **56%** (leads big 24% · trails 27%) | **NYG** pass 51% ▲ **52%** (leads big 20% · trails 32%)

competitive / both pass · 47% **both pass games + bring-back live** — CeeDee Lamb, Malik Nabers

BAL vs IND O/U 50.0 · BAL -3.0 · sim total 50.0 · p 0.09

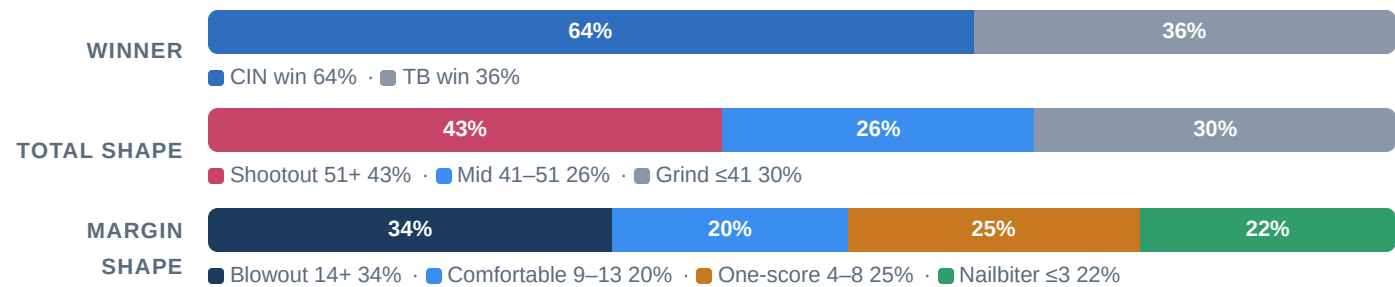

Most likely: BAL wins, a one-score game (4–8) the model hits 27% of the time, in what profiles as a shootout (51+) (43%). BAL is favored to win 59% of sims; the total clears the posted 50.0 in 46%.
Script read: no single script dominates — it profiles as a competitive, pass-friendly game where neither side controls and both offenses stay aggressive; the bring-back stays live.

Script-adjusted pass lean: **BAL** pass 46% ■ 46% (leads big 27% · trails 20%) | **IND** pass 53% ▲ 55% (leads big 14% · trails 36%)

competitive / both pass · 46% **both pass games + bring-back live** — Zay Flowers, Alec Pierce

CIN vs TB O/U 50.0 · CIN -5.0 · sim total 50.0 · p 0.09

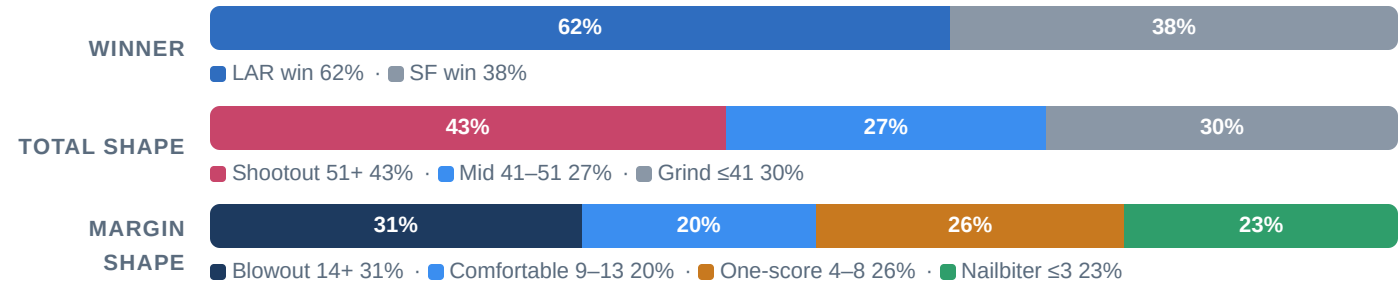

Most likely: CIN wins, a blowout (14+) the model hits 34% of the time, in what profiles as a shootout (51+) (43%). CIN is favored to win 64% of sims; the total clears the posted 50.0 in 46%.
Script read: CIN pulls away by two scores in 36% of sims — a clock-control script that feeds the CIN run game; TB is trailing (and throwing to catch up) in 44%.

Script-adjusted pass lean: **CIN** pass 58% ▼ 57% (leads big 35% · trails 19%) | **TB** pass 53% ▲ 56% (leads big 14% · trails 44%)

CIN clock-control · 36% **CIN lead RB / run game** — Tee Higgins, Joe Burrow
TB comeback pass · 44% **TB pass-catchers** — Baker Mayfield, Emeka Egbuka

LAR vs SF O/U 50.0 · LAR -3.5 · sim total 50.0 · p 0.09

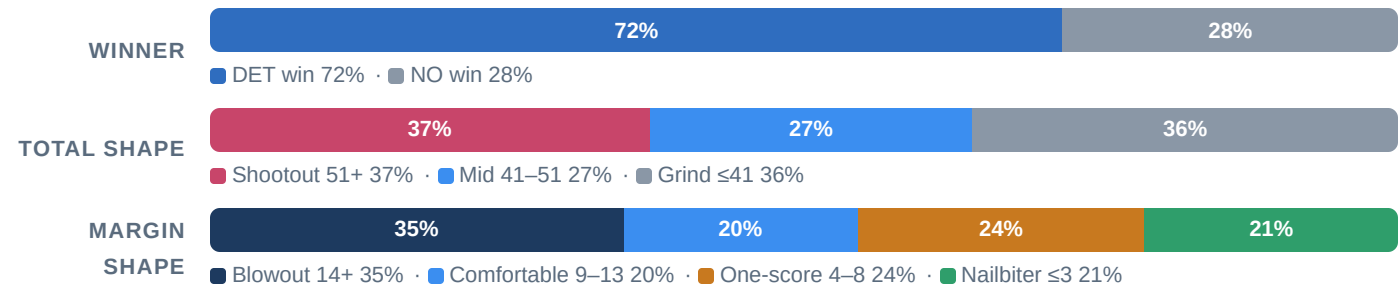

Most likely: LAR wins, a blowout (14+) the model hits 31% of the time, in what profiles as a shootout (51+) (43%). LAR is favored to win 62% of sims; the total clears the posted 50.0 in 46%.
Script read: SF is trailing (and throwing to catch up) in 41%.

Script-adjusted pass lean: **LAR** pass 55% ▼ 54% (leads big 32% · trails 20%) |
SF pass 53% ▲ 55% (leads big 14% · trails 41%)

SF comeback pass · 41% SF pass-catchers — Ricky Pearsall, Mike Evans

DET vs NO O/U 47.5 · DET -7.5 · sim total 47.5 · p 0.08

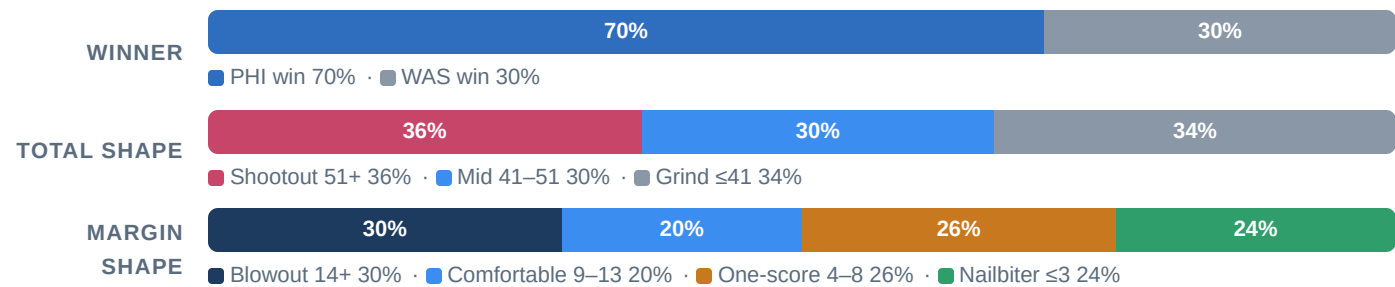

Most likely: DET wins, a blowout (14+) the model hits 35% of the time, in what profiles as a shootout (51+) (37%). DET is favored to win 72% of sims; the total clears the posted 47.5 in 46%.
Script read: DET pulls away by two scores in 41% of sims — a clock-control script that feeds the DET run game; NO is trailing (and throwing to catch up) in 50%.

Script-adjusted pass lean: **DET** pass 54% ▼ 52% (leads big 41% · trails 13%) |
NO pass 54% ▲ 58% (leads big 9% · trails 50%)

DET clock-control · 41% DET lead RB / run game — Jahmyr Gibbs, Isiah Pacheco
NO comeback pass · 50% NO pass-catchers — Chris Olave, Juwan Johnson

PHI vs WAS
O/U 47.5 · PHI -6.5 · sim total 47.5 · p 0.08

Most likely: PHI wins, a blowout (14+) the model hits 30% of the time, in what profiles as a shootout (51+) (36%). PHI is favored to win 70% of sims; the total clears the posted 47.5 in 46%.

Script read: PHI pulls away by two scores in 37% of sims — a clock-control script that feeds the PHI run game; WAS is trailing (and throwing to catch up) in 47%.

Script-adjusted pass lean:
 PHI pass 50% ▼ 49% (leads big 37% · trails 13%) |
 WAS pass 52% ▲ 55% (leads big 8% · trails 47%)

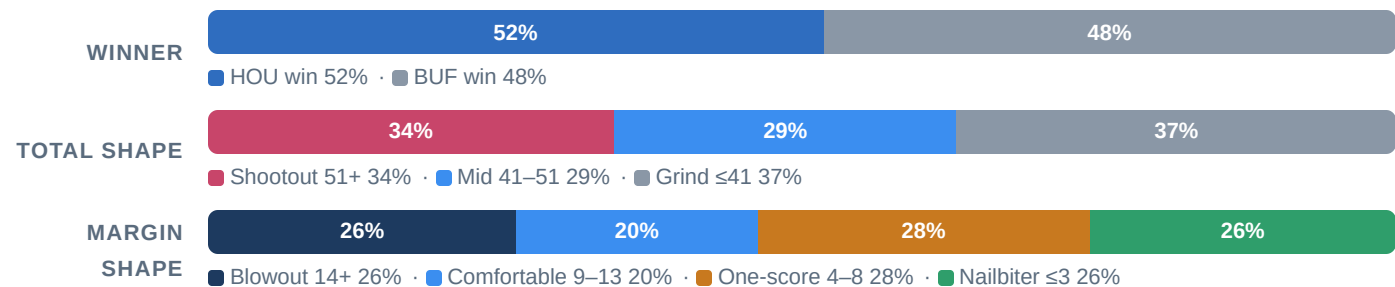

PHI clock-control · 37%

PHI lead RB / run game — DeVonta Smith, Jalen Hurts

WAS comeback pass · 47%

WAS pass-catchers — Rachaad White, Jacory Croskey-Merritt

BUF vs HOU
O/U 46.5 · HOU -0.5 · sim total 46.6 · p 0.08

Most likely: HOU wins, a one-score game (4-8) the model hits 28% of the time, in what profiles as a low-scoring grind (≤41) (37%). HOU is favored to win 52% of sims; the total clears the posted 46.5 in 46%.

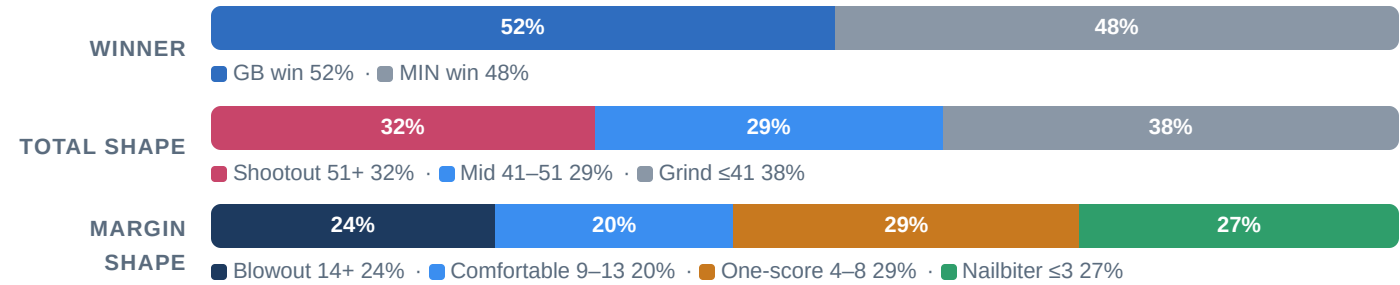

Script read: a low-total grind — ceilings suppressed on both sides, no script edge to chase.

Script-adjusted pass lean:
 HOU pass 55% ▲ 56% (leads big 22% · trails 27%) |
 BUF pass 50% ▲ 51% (leads big 20% · trails 30%)

low-total grind · 37%

fade — ceilings suppressed

GB vs MIN O/U 46.0 · GB -1.0 · sim total 46.1 · p 0.07

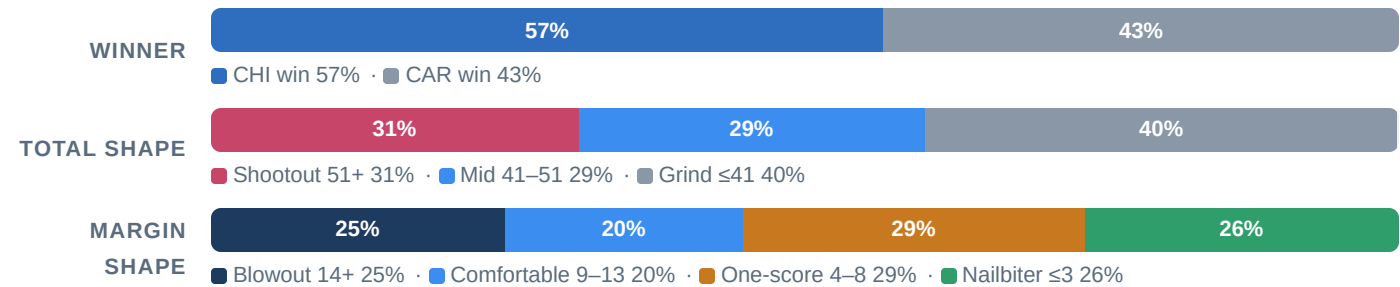

Most likely: GB wins, a one-score game (4–8) the model hits 29% of the time, in what profiles as a low-scoring grind (≤41) (38%). GB is favored to win 52% of sims; the total clears the posted 46.0 in 46%.
Script read: a low-total grind — ceilings suppressed on both sides, no script edge to chase.

Script-adjusted pass lean: **GB** pass 53% ▲ 54% (leads big 22% · trails 25%) |
MIN pass 56% ▲ 58% (leads big 17% · trails 30%)

low-total grind · 38% fade — ceilings suppressed

CAR vs CHI O/U 45.5 · CHI -2.0 · sim total 45.6 · p 0.07

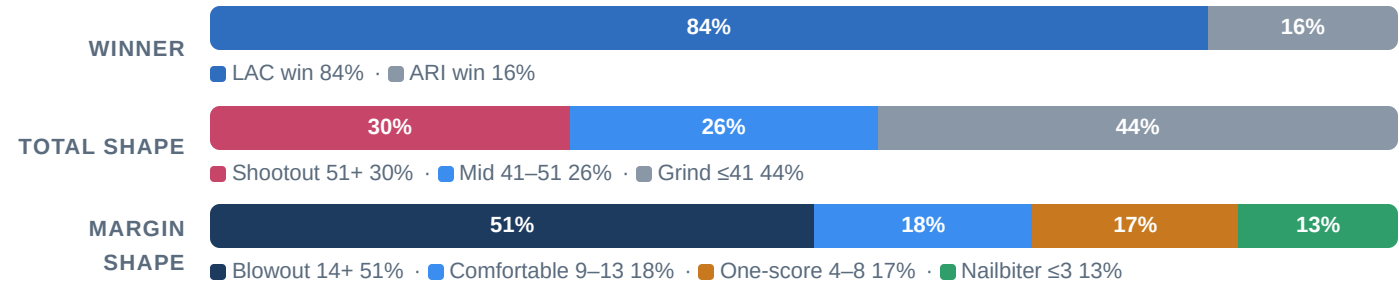

Most likely: CHI wins, a one-score game (4–8) the model hits 29% of the time, in what profiles as a low-scoring grind (≤41) (40%). CHI is favored to win 57% of sims; the total clears the posted 45.5 in 46%.
Script read: a low-total grind — ceilings suppressed on both sides, no script edge to chase.

Script-adjusted pass lean: **CHI** pass 52% ▲ 52% (leads big 25% · trails 22%) |
CAR pass 54% ▲ 56% (leads big 15% · trails 34%)

low-total grind · 40% fade — ceilings suppressed

ARI vs LAC O/U 45.0 · LAC -13.0 · sim total 44.9 · p 0.07

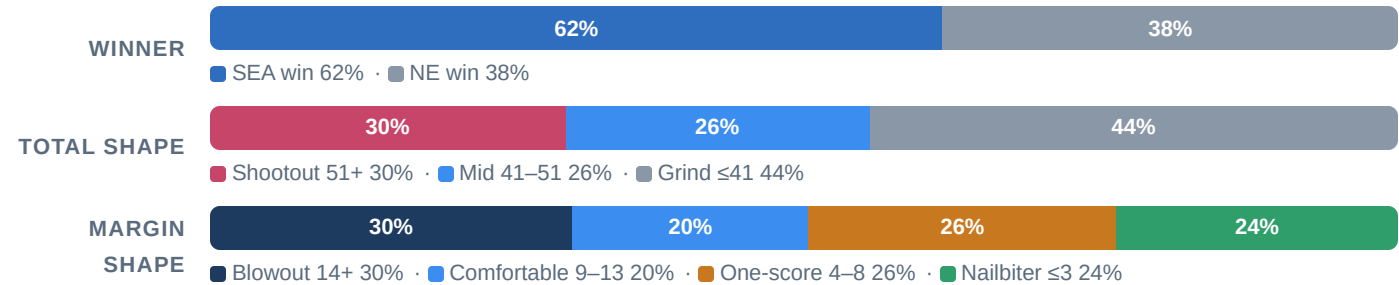

Most likely: LAC wins, a blowout (14+) the model hits 51% of the time, in what profiles as a low-scoring grind (≤41) (44%). LAC is favored to win 84% of sims; the total clears the posted 45.0 in 45%.
Script read: LAC pulls away by two scores in 60% of sims — a clock-control script that feeds the LAC run game; ARI is trailing (and throwing to catch up) in 69%.

Script-adjusted pass lean: **LAC** pass 54% ▼ **51%** (leads big 60% · trails 8%) |
ARI pass 59% ▲ **64%** (leads big 6% · trails 69%)

- LAC clock-control · 60% **LAC lead RB / run game** — Oronde Gadsden II, Quentin Johnston
- ARI comeback pass · 69% **ARI pass-catchers** — Jeremiah Love, Tyler Allgeier

NE vs SEA O/U 45.0 · SEA -3.5 · sim total 44.6 · p 0.07

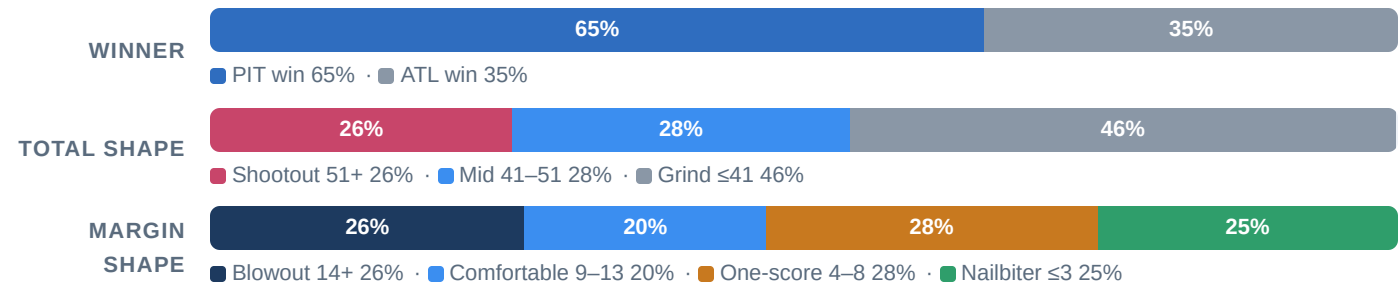

Most likely: SEA wins, a blowout (14+) the model hits 30% of the time, in what profiles as a low-scoring grind (≤41) (44%). SEA is favored to win 62% of sims; the total clears the posted 45.0 in 44%.
Script read: a low-total grind — ceilings suppressed on both sides, no script edge to chase.

Script-adjusted pass lean: **SEA** pass 52% ▼ **52%** (leads big 31% · trails 20%) |
NE pass 52% ▲ **55%** (leads big 15% · trails 40%)

- low-total grind · 44% **fade** — ceilings suppressed

ATL vs PIT O/U 43.0 · PIT -4.5 · sim total 43.4 · p 0.06

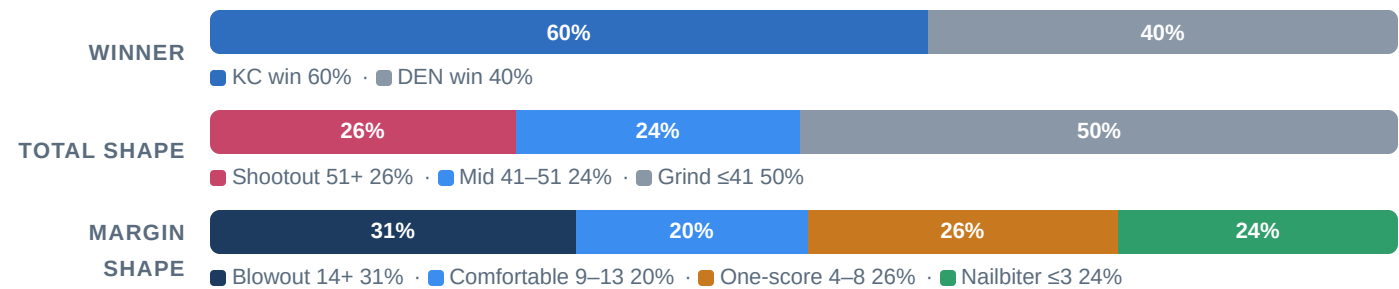

Most likely: PIT wins, a one-score game (4-8) the model hits 28% of the time, in what profiles as a low-scoring grind (≤41) (46%). PIT is favored to win 65% of sims; the total clears the posted 43.0 in 47%.
Script read: ATL is trailing (and throwing to catch up) in 41%.

Script-adjusted pass lean: PIT pass 56% ▼ 56% (leads big 31% · trails 16%) | ATL pass 55% ▲ 58% (leads big 11% · trails 41%)

ATL comeback pass · 41% ATL pass-catchers — Kyle Pitts Sr., Drake London

DEN vs KC O/U 42.5 · KC -3.0 · sim total 42.5 · p 0.06

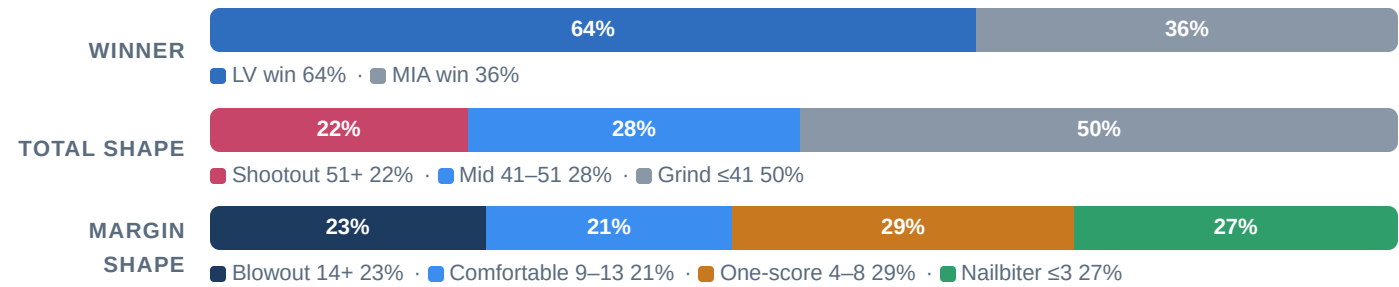

Most likely: KC wins, a blowout (14+) the model hits 31% of the time, in what profiles as a low-scoring grind (≤41) (50%). KC is favored to win 60% of sims; the total clears the posted 42.5 in 46%.
Script read: a low-total grind — ceilings suppressed on both sides, no script edge to chase.

Script-adjusted pass lean: KC pass 56% ▼ 56% (leads big 30% · trails 21%) | DEN pass 56% ▲ 58% (leads big 15% · trails 39%)

low-total grind · 50% fade — ceilings suppressed

LV vs MIA O/U 42.0 · LV -4.0 · sim total 42.1 · p 0.06

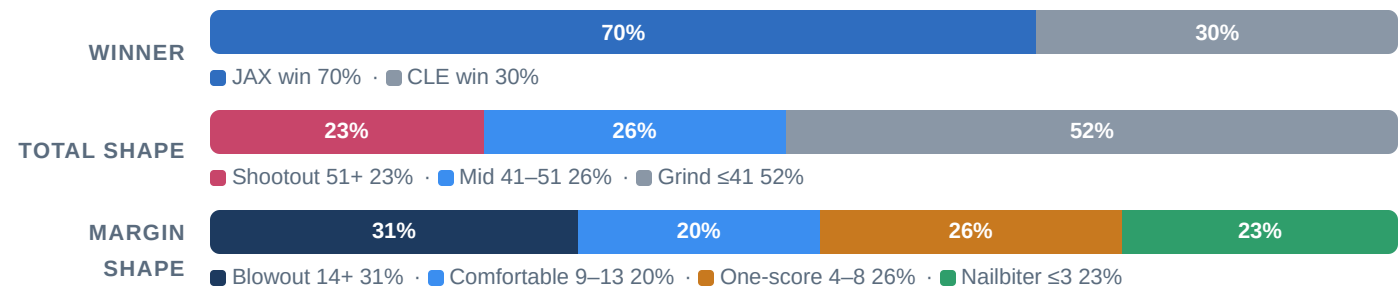

Most likely: LV wins, a one-score game (4-8) the model hits 29% of the time, in what profiles as a low-scoring grind (≤41) (50%). LV is favored to win 64% of sims; the total clears the posted 42.0 in 46%.
Script read: a low-total grind — ceilings suppressed on both sides, no script edge to chase.

Script-adjusted pass lean: LV pass 56% ▼ 55% (leads big 29% · trails 16%) |
MIA pass 51% ▲ 54% (leads big 10% · trails 39%)

low-total grind · 50% fade — ceilings suppressed

CLE vs JAX O/U 41.5 · JAX -6.0 · sim total 42.0 · p 0.05

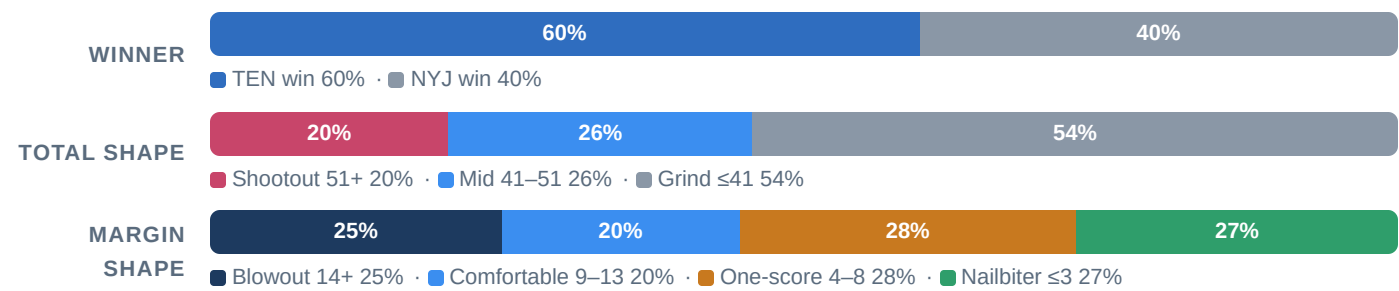

Most likely: JAX wins, a blowout (14+) the model hits 31% of the time, in what profiles as a low-scoring grind (≤41) (52%). JAX is favored to win 70% of sims; the total clears the posted 41.5 in 47%.
Script read: JAX pulls away by two scores in 37% of sims — a clock-control script that feeds the JAX run game; CLE is trailing (and throwing to catch up) in 47%.

Script-adjusted pass lean: JAX pass 56% ▼ 55% (leads big 37% · trails 14%) |
CLE pass 54% ▲ 57% (leads big 10% · trails 47%)

JAX clock-control · 37% JAX lead RB / run game
CLE comeback pass · 47% CLE pass-catchers — Harold Fannin Jr., Jerry Jeudy

NYJ vs TEN
 O/U 41.0 · TEN -3.5 · sim total 41.0 · p 0.05

Most likely: TEN wins, a one-score game (4–8) the model hits 28% of the time, in what profiles as a low-scoring grind (≤41) (54%). TEN is favored to win 60% of sims; the total clears the posted 41.0 in 46%.
 Script read: a low-total grind — ceilings suppressed on both sides, no script edge to chase.

Script-adjusted pass lean: TEN pass 56% ■ 56% (leads big 27% · trails 19%) | NYJ pass 54% ▲ 56% (leads big 13% · trails 36%)

low-total grind · 54%
 fade — ceilings suppressed
