Game Plan & Intel

Draft Priority - Team Priority - Stacks - DFS Scenarios - Personnel & Scheme

This plan FUSES models rather than overfitting one. The market (ADP), the consensus board, Clay projections, the ceiling sim, advancement, and coachspeak each get a vote; the DIVERGENCE between them is the signal. Grounded in nflfastR 2024-25 play-by-play, Clay-2026 team volume, the compositional Monte-Carlo sim, the PBP-fit correlation structure, and the real 2026 schedule. Pair it with the live command-center dashboard for sorting and search.

1 - Model Fusion: where the models disagree

Each model is a within-position percentile (0-100). Within a position the market and the models broadly agree on talent order, so genuine edges are concentrated: the market OVERPAYS more often (narrative QBs the ceiling/advancement models are cooler on) than it UNDERPAYS. Trust the divergence, not any single number.

Market FADES - models love, market sleeps (target these)

2 - Draft Priority: ceiling-first tiers

Tiers are ceiling-weighted ($0.5 * p95 + 0.25 * \text{spike} + 0.25 * \text{advancement}$, within position) cross-referenced with ADP. Take the ceiling, not the floor.

4 - Stacks: QB + catchers + Week-17 bring-back

QB->WR1 correlates $r \sim 0.35$; a bring-back from the Week-17 finals opponent plays both sides of the game ($r \sim 0.13-0.16$ in high totals). Combined ceiling = sum of members p95; cost = sum of ADP. LEVERAGE = cheaper / lower-profile.

5 - DFS: which game scripts unlock each ceiling

Scenario	Total	Spread	ScoreDiff	Read
Baseline (neutral)	44.5	0	0	League-average game: even total, pick'em spread
Shootout (high total)	51	0	0	Both teams move the ball; high total lifts players
Trailing / negative script	47	-6	-7	Underdog chasing points: pass volume UP, rush
Leading / positive script	45	7	7	Favored & ahead: run-script, clock control ->
Low-total grind	37	0	0	Defensive, low-scoring slog: every volume change
Blow-up funnel (garbage time)	50	-10	-10	Getting blown out: maximum pass funnel, garbage

Absolute probabilities are conservative (lognormal understates the tail) - read the RELATIVE shifts. For GPP leverage, combine shootout + trailing.

6 - Personnel & Scheme: how each team looks different

Legend. OFFENSE = data-modeled (vacated targets, arrivals/departures, projected volume shift). DEFENSE / O-LINE / COORDINATOR = corpus-sourced and sparse (11/4/9 of 32). 2026 coordinators are never asserted from memory.

ARI - Arizona Cardinals ~23.6% targets vacated

Offense. 24% of 2025 target volume departs (M.Carter (7% of '25 tgt vol -> gone); E.Higgins (6% of '25 tgt vol -> gone); G.Dortch (5% of '25 tgt vol -> DET); Z.Knight (5% of '25 tgt vol -> gone)). Incoming -- arrivals: Tyler Allgeier, Kendrick Bourne; rookies: Jeremiah Love. With projected pass attempts DOWN -7.5/g vs 2025, the vacated work most plausibly flows to Jeremiah Love (RB, ADP 26.5, p95 37), Tr

In: Tyler Allgeier (from ATL), Kendrick Bourne (from SF) Out: M.Carter->gone, E.Higgins->gone, G.Dortch->DET, Z.Knight->gone

Beneficiaries: Jeremiah Love, Trey McBride, Marvin Harrison Jr.

Scheme. However, Hackett got hired as the offensive coordinator in Arizona. -> The note states a staff change but no clear pass/run lean; with modeled pass attempts DOWN sharply (-7.5/g) there is no confident WR-room lift -- treat as scheme-uncertain / neutral.

ATL - Atlanta Falcons ~20.7% targets vacated

Offense. 21% of 2025 target volume departs (D.Mooney (14% of '25 tgt vol -> NYG); D.Sills (7% of '25 tgt vol -> gone)). Incoming -- arrivals: Tua Tagovailoa, Olamide Zaccheaus, Jahan Dotson; rookies: Zachariah Branch. With pass volume roughly flat (-0.4/g), the vacated work most plausibly flows to Bijan Robinson (RB, ADP 2.1, p95 46), Drake London (WR, ADP 15.7, p95 38), Kyle Pitts Sr. (TE, ADP 93.9, p95 2

In: Tua Tagovailoa (from MIA), Olamide Zaccheaus (from CHI), Jahan Dotson (from PHI) Out: D.Mooney->NYG, D.Sills->gone

Beneficiaries: Bijan Robinson, Drake London, Kyle Pitts Sr.

Defense. "And no matter who's in there for this Falcons defense." (@sigmundbloom)

Scheme. -> no corpus signal -- no scheme assumption

BAL - Baltimore Ravens ~18.3% targets vacated

Offense. 18% of 2025 target volume departs (D.Hopkins (10% of '25 tgt vol -> FA); I.Likely (9% of '25 tgt vol -> NYG)). Incoming -- arrivals: Ja'Kobi Lane. With pass volume roughly flat (-0.1/g), the vacated work most plausibly flows to Derrick Henry (RB, ADP 20.4, p95 37), Zay Flowers (WR, ADP 36.5, p95 36), Mark Andrews (TE, ADP 131.3, p95 25).

In: Ja'Kobi Lane (from WAS) Out: D.Hopkins->FA, I.Likely->NYG

Beneficiaries: Derrick Henry, Zay Flowers, Mark Andrews

Defense. "This is the most talented pass rusher the Ravens have had in years, and remember this, the last two fully healthy years he's had, 23 and 24, 17 and a half sacks each year." (@dhananizain)

Scheme. -> no corpus signal -- no scheme assumption

BUF - Buffalo Bills ~16.8% targets vacated

Offense. 17% of 2025 target volume departs (K.Coleman (12% of '25 tgt vol -> MIA); T.Shavers (5% of '25 tgt vol -> gone)). Incoming -- rookies: DJ Moore. With projected pass attempts DOWN -2.8/g vs 2025, the vacated work most plausibly flows to James Cook III (RB, ADP 10.6, p95 37), DJ Moore (WR, ADP 44.2, p95 31), Khalil Shakir (WR, ADP 122.9, p95 27).

Out: K.Coleman->MIA, T.Shavers->gone

Beneficiaries: James Cook III, DJ Moore, Khalil Shakir

Scheme. -> no corpus signal -- no scheme assumption

CAR - Carolina Panthers ~20% targets vacated

Offense. 20% of 2025 target volume departs (R.Dowdle (10% of '25 tgt vol -> PIT); H.Renfrow (5% of '25 tgt vol -> gone); M.Evans (5% of '25 tgt vol -> gone)). Incoming -- arrivals: Trevor Etienne, John Metchie III; rookies: Jonathon Brooks. With projected pass attempts DOWN -1.5/g vs 2025, the vacated work most plausibly flows to Tetairoa McMillan (WR, ADP 42.1, p95 36), Chuba Hubbard (RB, ADP 71.8, p95 26

In: Trevor Etienne (from JAX), John Metchie III (from NYJ) Out: R.Dowdle->PIT, H.Renfrow->gone, M.Evans->gone

Beneficiaries: Tetairoa McMillan, Chuba Hubbard, Jalen Coker

Scheme. -> no corpus signal -- no scheme assumption

CHI - Chicago Bears ~27.2% targets vacated

Offense. 27% of 2025 target volume departs (D.Moore (16% of '25 tgt vol -> gone); O.Zaccheaus (11% of '25 tgt vol -> ATL)). Incoming -- arrivals: Kalif Raymond. Out: R.Doubs->NE, D.Wicks->PHI

Beneficiaries: Josh Jacobs, Christian Watson, Matthew Golden

Scheme. He had gotten the job because he was the offensive coordinator with the Green Bay Packers for the previous three seasons. -> The scheme note describes a coach/system that LEFT GB, not a 2026 GB hire; no defensible 2026 direction -- hold neutral.

HOU - Houston Texans ~10.8% targets vacated

Offense. 11% of 2025 target volume departs (C.Kirk (11% of '25 tgt vol -> SF)). Incoming -- arrivals: David Montgomery; rookies: Tank Dell. In: David Montgomery (from DET) Out: C.Kirk->SF

Beneficiaries: Nico Collins, David Montgomery, Jayden Higgins

Scheme. The 2024 Houston Texans ran 12 personnel at the 3rd highest rate in the NFL at 31.5%. -> A 12-personnel-heavy identity caps pure spread passing; with one WR (Kirk) departed and modeled pass attempts DOWN (-4.6/g), the implication is a TE/play-action tilt rather than a WR-volume spike.

IND - Indianapolis Colts ~41.1% targets vacated

Offense. 41% of 2025 target volume departs (M.Pittman (19% of '25 tgt vol -> PIT); A.Mitchell (12% of '25 tgt vol -> NYJ); J.Taylor (9% of '25 tgt vol -> JAX)). No notable skill arrivals. Defense. "Two seasons ago, O'Leary was the safeties coach with the Chargers under Jesse Minter." (@thepowerrank)

O-line. "And of course, the offensive line is hopefully fingers crossed with the Chargers, as always." (@joshnorris)

Scheme. The bad news for Chargers fans is that O'Leary has only been a defensive coordinator for one season. -> Signal is defense/OL-side, not an offensive scheme change -- no WR/RB volume implication can be defended from it.

LAR - Los Angeles Rams ~8.9% targets vacated

Offense. 9% of 2025 target volume departs (D.Allen (5% of '25 tgt vol -> gone); K.Mumpfield (4% of '25 tgt vol -> gone)). No notable skill arrivals. O-line. "Now, the Raiders addressed this in one big way when they signed Tyler Linderbaum to that record-setting contract for a center, but other than that, they're pretty much banking on young middle-round guys." (@benjaminsolak)

Scheme. New season, and you guys have a lot of the same parts of the team, but certainly some new members of your coaching staff, Clint Kubiak, your offensive coordinator, now the head coach of the Las Vegas Raiders. -> Corpus stresses an OL-built run game, so the lean is toward establishing the run -> mild RB tilt; but pass volume is modeled roughly flat (-0.9/g), so no strong WR lift.

MIA - Miami Dolphins ~44% targets vacated

Offense. 44% of 2025 target volume departs (J.Waddle (22% of '25 tgt vol -> DEN); D.Waller (8% of '25 tgt vol -> FA); T.Hill (6% of '25 tgt vol -> gone); J.Hill (4% of '25 tgt vol -> gone)). Beneficiaries: De'Von Achane, Greg Dulcich, Chris Bell

Scheme. When new general manager John Eric Sullivan and new head coach Jeff Halfley arrived in Miami earlier this year, we saw one of the biggest overhauls of a roster that we have ever seen in the NFL. -> Corpus confirms a top-to-bottom regime change but NOT the offensive pass/run direction; with the WR room gutted (Waddle/Hill out, 44% of targets vacated) the scheme is unsettled -- low confidence, treat incoming/young WRs as dart throws.

MIN - Minnesota Vikings ~22.8% targets vacated

Beneficiaries: Breece Hall, Garrett Wilson, Kenyon Sadiq

Scheme. However, he was still a hot commodity because Aaron Rodgers was going to the New York Jets, and the Jets were more than happy to hire his buddy to be the offensive coordinator. -> The note establishes a new play-caller but no clear pass lean; with 40.5% of targets vacated and pass volume ~flat (-1.7/g) the room is wide open but the direction is unproven -- no confident tilt.

PHI - Philadelphia Eagles ~33.3% targets vacated

Beneficiaries: Saquon Barkley, DeVonta Smith, Makai Lemon

Defense. "When he got drafted, because he had some really nice pass rush reps, the question was, you know, are the Eagles going to move him to the end?" (@sammonsonnfl)

Scheme. New Eagles offensive coordinator Sean Mannion hasn't called plays in the NFL before, but he was an offensive coordinator at the East West Shrine Bowl this year. -> A first-time play-caller succeeding a run-leaning staff; corpus gives no explicit pass-up signal and modeled pass attempts are DOWN (-2.3/g) after A.J. Brown's exit -- do NOT assume a WR-friendly tilt; neutral-to-cautious.

Scheme. One of the most exciting quotes of the offseason came a couple weeks ago when new Buccaneers offensive coordinator Zach Robinson said that Amika Igbuka is going to play the Z in his offense. -> A McVay-branch OC plus an explicit role quote points to a defined WR-usage scheme; with 29.6% of targets vacated (Evans/Shepard) this most plausibly LIFTS the returning/young WRs (Egbuka, Godwin) even with pass volume modeled slightly down (-4.4/g).
